

Changing the Report Year

The information on this page only applies to version 6.03 of the Reporting Software Options and related documentation. See [this page](#) for other versions of the documentation. The version number of the PRL software you are using can be found on the Help menu under the About item.

Background

The current [report year](#) is prominently displayed near the top of the [Registration form](#) and on each of the forms. If you are entering data for a different [report year](#), you can change the year.

Changing the Report Year

1. To do this, either click the **Change Year** button on the [Registration form](#) or choose the **Change Year** menu item on the **Tools** menu.
2. Then type in the new year and click **OK**.

Results

- If the PRLyyyy subfolder (where "yyyy" = four-digit [report year](#)) does not yet exist for the current report year, it is created.
- If the [identity.txt](#) file already exists in the [report year folder](#), it is opened and the contents loaded into the contact and information boxes of the [Registration form](#).
- If the [identity.txt](#) file does not exist, the contact and identity entries from the [Registration form](#) are saved to a new file.
- Report files are *not* automatically moved from the previous [report year folder](#) to the newly selected one.
